Nautibuoy

Designed by yachtsmen, for yachtsmen

Because our platforms have been designed by yachtsmen for yachtsmen, we understand the finer details of maintaining your yacht.

Available in four different sizes, the NautiBuoy Marine Platform is stable, simple to manoeuvre and easy to lift from the water. These are the essential features but we didn't stop there. From stainless steel D-rings to soft handles that don't scratch the boat or mark the deck, we've thought it all through.

One of the key features is our unique Air Toggle System, which as well as allowing platforms to be linked in multiple configurations*, provide 2nd and 3rd air chambers for safety.

Leisure packages enable you to adapt the platform so you can relax with headrests and comfort seats. There's also a 4-step ladder that makes getting out of the water a breeze.

Our platforms are handmade to the highest standard. There's been no compromise on quality – we've obsessed over every minute detail to bring you a product that will exceed your expectations.

Platforms

Platform sizes

All our platforms are made from 200mm (7.5") deep dropstitch, pack down to a conveniently stowable size and with 4 different sizes, there is a platform to fit every yacht.

Stowage sizes

“I'm not sure how we survived before the NautiBuoy came into our lives. It's become part of the yacht's procedure when berthing. Washdowns and hull detailing have never been so easy and it's never long until we get another yacht in the marina asking to borrow it.”

Andy Sheltrum,
Captain, Bliss

Leisure

Unparalleled luxury at water level

Covered with a choice of either Teak effect foam or Diamond non-skid soft surface and made incredibly stable by our unique ballast system, the NautiBuoy Marine Platform offers a new freedom from the confines of the yacht. Not only is it a fantastic swim platform, but also an ideal base to enjoy a multitude of watersports and activities.

A great space for sunbathing and relaxation, accessories including comfort seats and faux leather headrests are available to optimise your guests experience.

Jetski Dock

Unique Air Toggle linking system

Our Air Toggle technology enables multiple platforms to be linked in a variety of ways,

By simply connecting any two platforms in a T-shape, you're able to configure your own jet-ski dock. This limits any damage to transoms and jet-skis, as well as providing a safer, easier transfer for yourself and your guests.

For yachts with higher transoms (up to 50cm above the waterline), we have specially designed transom bumpers that work in conjunction with our platforms.

Maintenance

A tender free solution

The NautiBuoy Marine platform easily converts into a maintenance tool by simply adding the lightweight, non-skid, fitted protection cover. It can be inflated single-handedly and launched anywhere in less than five minutes, providing instant access to the waterline. Our unique ballast bag system provides excellent stability in the water and enables easy removal after use.

With the addition of the collapsible velcro bottom buckets and hose holders available in our maintenance pack, your crew can work efficiently around the sides without losing equipment over the side.
