

The latest edition to the NautiBuoy range

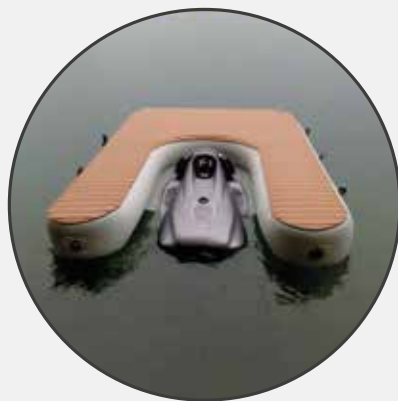

# Brilliantly Simple

## Innovative thinking

One year on, after winning the international DAME design and innovation award, NautiBuoy Marine introduces the NEW Patent Pending C-Dock.

A docking system compatible with Seabobs, it is another modular addition to the NautiBuoy inflatable range.

## Avoid lifting

### Drive straight in

The C-Dock avoids the need for repetitive lifting of Seabobs from in and out of the water.

A brilliantly simple design providing a drive-in / drive-out solution.

Compatible with both the F5 and F5S Seabobs.

## Safe, Secure & Protected

### A “garage” at water level

Your Seabob is an investment that deserves to be looked after.

The C-Dock offers you peace of mind, providing your Seabob with a convenient method of protection, from yachts, jet-skis and other watersports equipment.

With buckle and webbing security straps. It's not going anywhere.

## Training Station

### See the controls

Beginners can practice their skills and get an understanding of the Seabob controls with more confidence.

Contained within the C-Dock and in a more controlled environment, the Seabob controls are even easier to get to grips with.

Instructors can be conveniently on hand to provide step-by-step tuition.

Due to design changes and improvements, the Platforms & C-Docks present in the pictures may not exactly depict the product purchased by the consumer.

Seabob is a trademark of CAYAGO AG. The C-Dock is not connected with CAYAGO AG in anyway and no endorsement of the C-Dock from CAYAGO AG should be implied in anyway.

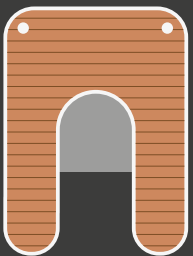

## The latest edition to the NautiBuoy range

Available in two different options, the C-Dock offers versatility due to its solo, modular and off-the-shelf nature.

### C-Dock Sport

The Sports C-Dock offers a unique “RIB collar” style solution, that is even more lightweight, stowable and quick to inflate.

### C-Dock Voyager

With a luxurious teak foam finish and drop stitch core this version has been designed with the same key features as the Sports version. Compatible with all sizes in the NautiBuoy platform range the Voyager C-Dock offers a smooth continuation of the NautiBuoy platform lines.

# Solo or Multiple

The flexibility to choose

With options to anchor, tether, be connected to other C-Docks or to NautiBuoy platforms, the choice and flexibility is yours.

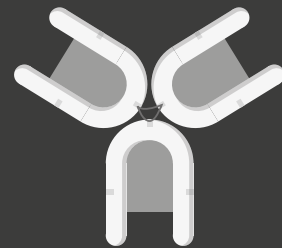

## C-Dock Sport

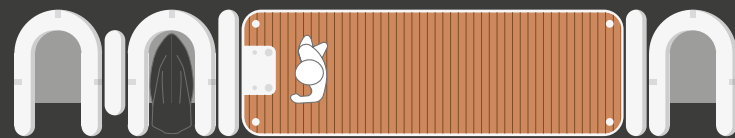

Solo

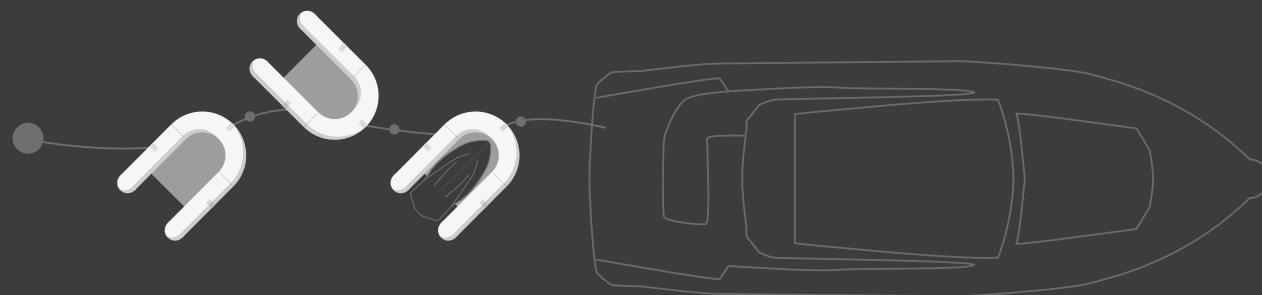

Connected together

Star formation

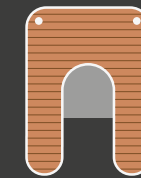

Connected to platform

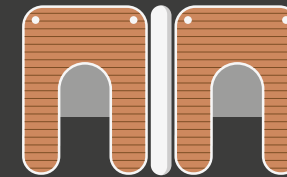

Herringbone formation

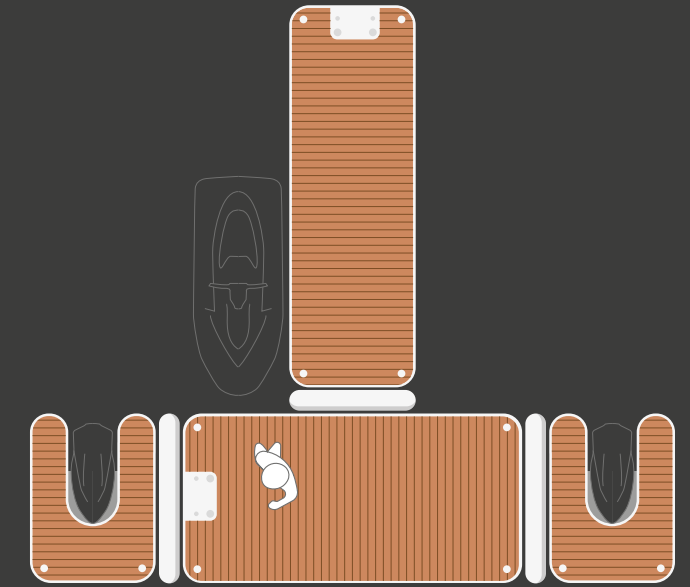

## C-Dock Voyager

Solo

Connected together

Watersports dock

## Avoid lifting

Drive straight in

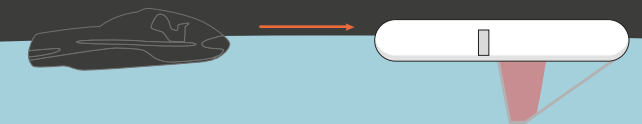

A drive-in/drive-out solution compatible with both the F5 and F5S Seabob.

## Lightweight

Stable & wind resistant

Lifting and sliding of the C-Dock on the water surface is prevented by the 40 litre (10.5 gallon) Ballast Bag which is designed to be simple to use and easy to empty.
